

Vocaro will simply record your voice and provide a link and or QR code for sharing.

No sign in required but you don't get to add an image. Once you have made your recording you can retry or save.

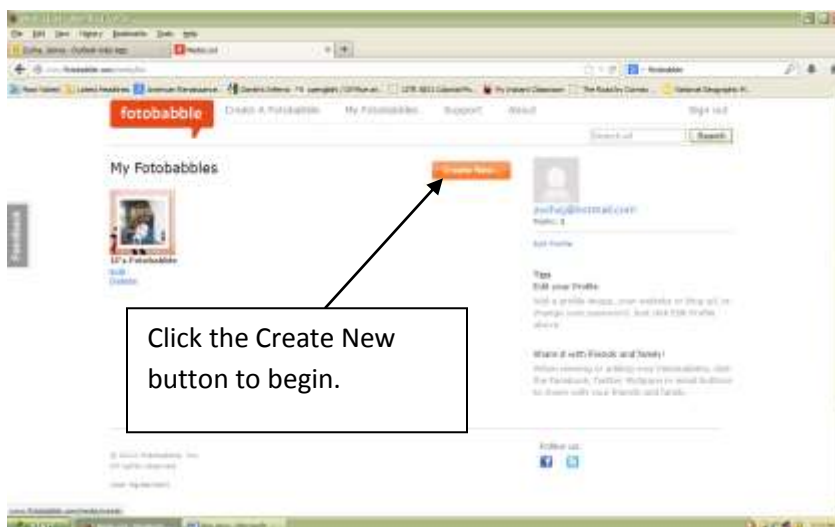

Once you save you are given several options for sharing:

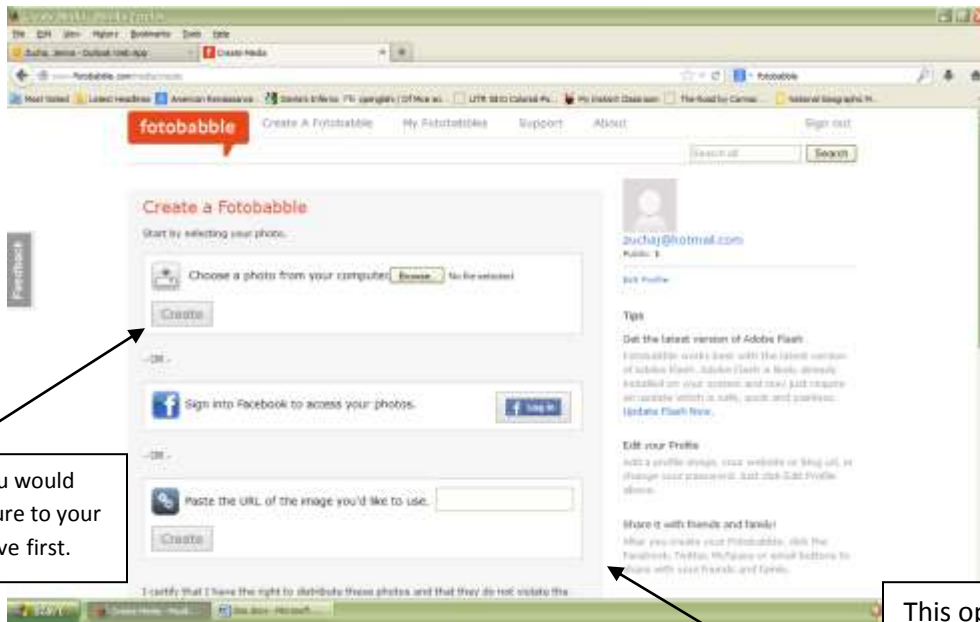

For this assignment I would just copy the link to place in an Edmodo post, but in the future we may use the QR code maker. If you are super proud of what you have done feel free to post to Facebook or email.

### Instructions for using Fotobabble:

1. You are now ready to log in to **Fotobabble** record your review, attach an image, and upload for sharing.
2. Sign in to your account and create...

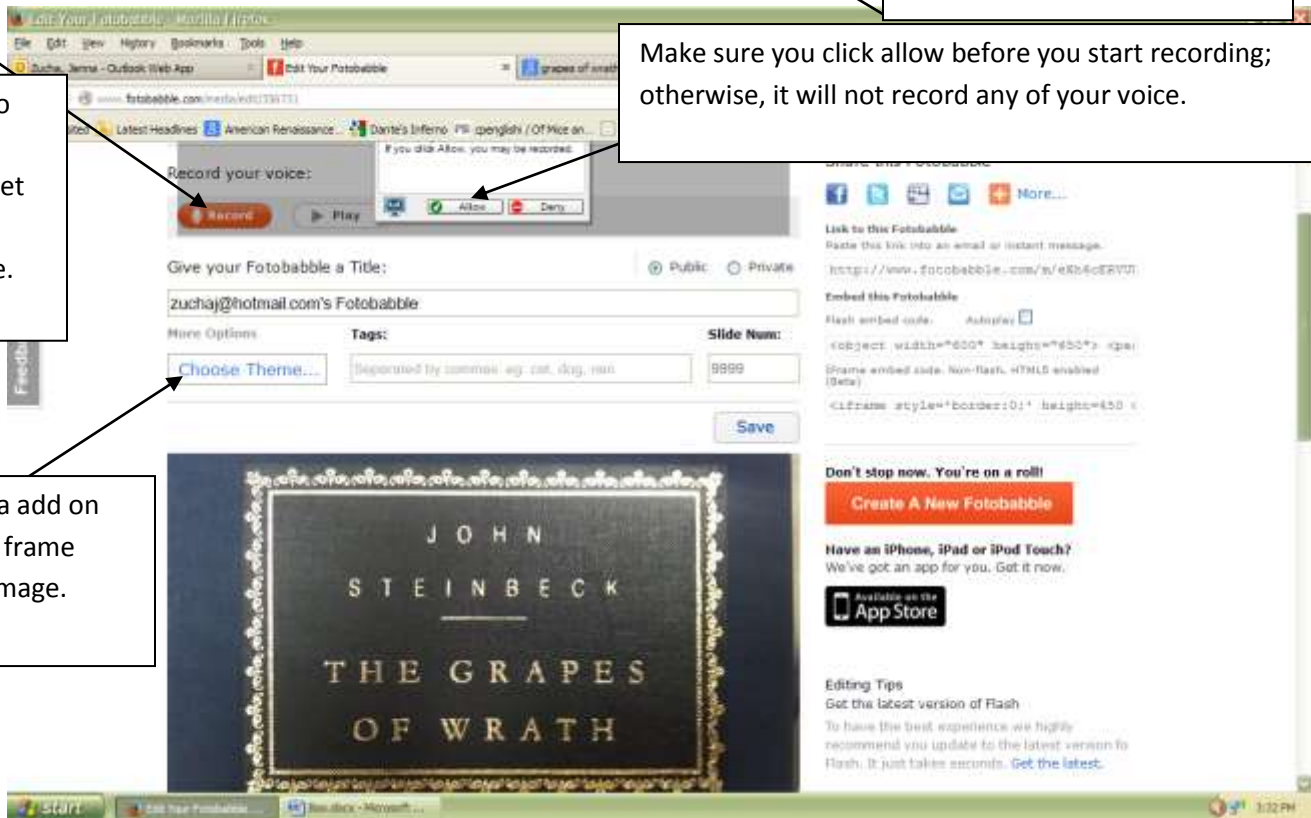

3. You will need to choose your image first, and you have several options to do this.

With this option you would need to save a picture to your documents or H drive first.

This option allows you to copy and paste the URL of any image on the web.

#### 4. The next step is to record your review.

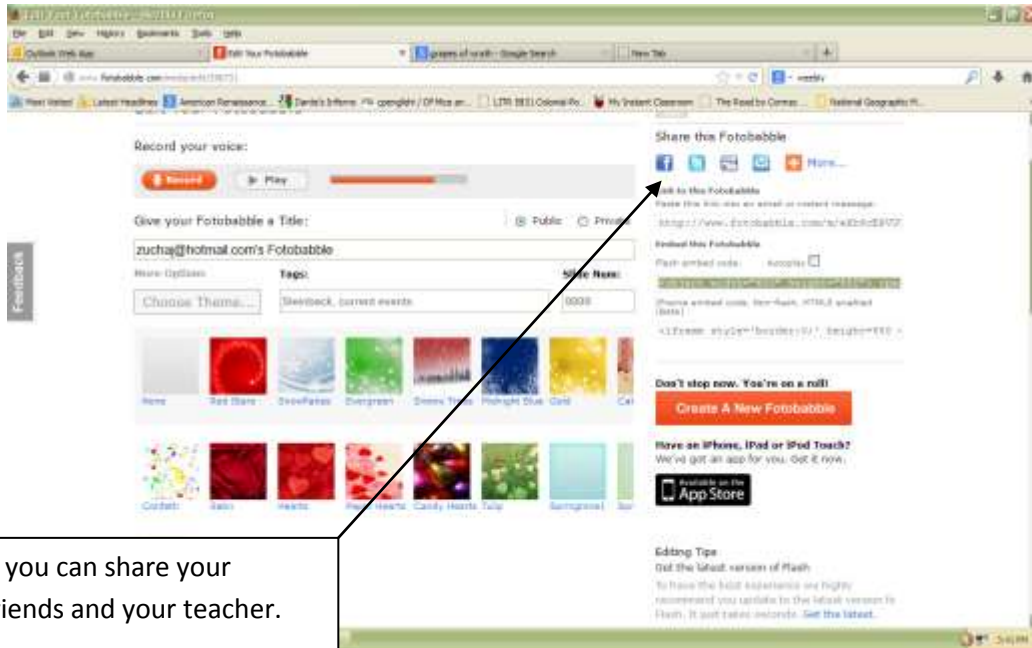

Press this button to record your voice. Speak loudly and get as close to your latitude as possible.

Make sure you click allow before you start recording; otherwise, it will not record any of your voice.

This is an extra add on that creates a frame around your image.

5. Once you are satisfied with your recording, theme, and image; click save and now you are ready to share.

Here is where you can share your babble with friends and your teacher.

Send an email, post to face book, or copy the link and place in Edmodo.
